Get to know all the products and the certificate that goes with them.

---

## **17. PRESENTATION PACK**

Display that accompanies the Fine Jewellery collection.

Handmade designs with

# 18K recycled gold

And **mine-free diamonds** that redefine jewelry essentials.

A fine jewelry line featuring **necklaces, earrings, hoops, rings and piercings**: accessories designed for any occasion and perfect for gift giving.

The jewelry is made with *18K solid gold* and *lab-grown diamonds free of mining*: high-end materials that allow us to **reduce our environmental impact**.

A collection that will make you want to wear

## diamonds at any time

Our designs are the **essentials for life**, our **Fine Jewelry** pieces are based on an *elegance* to accompany you in every moment of life.

Jewels that combine the *quality* and *durability* of gold with a more **contemporary soul**.

What elements can differentiate

## this collection

**Timeless designs reinvented:** Classic shapes *renewed* to be worn on a daily basis.

**Jewelry made traditionally and using the latest technology:** Made by a brand that has just turned *50 years old* and uses the highest quality in manufacturing.

**Gold is fashionable:** With this collection, we respond to the desires of a cosmopolitan and *trend-following woman*.

Discover the characteristics that make

## special this collection

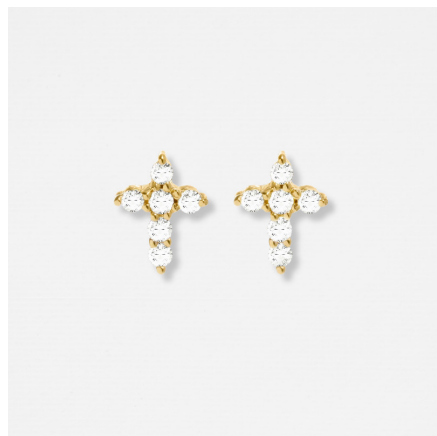

**Quality at a fair price:** High quality gold jewelery with *18 K gold* or rhodium finish.

**Natural stones:** Stones that *elevate any outfit* and can be worn on a daily basis.

**Jewelry that stands out:** Pieces that *speak for themselves*.

A collection handcrafted with

## quality materials

**MATERIAL:** *18 karat gold.*

**STONES:** *Diamonds free of mining.* We measure their quality standards and unique characteristics through the universal 4Cs guide.

Lab-grown: a process for

## diamond creation

Lab-grown diamonds are **crafted by replicating the way natural diamonds are created** in nature, using the latest technology to replicate the natural diamond creation process *without the negative human impact* that mining can have.

All our diamonds are evaluated for cut, **clarity, color** and **carat**. They are sourced in accordance with the Kimberley Process and the **World Diamond Council's System of Warranties**.

All of our diamond jewelry is accompanied by a **certificate** to *verify the traceability and origin* of the diamonds.

## Are lab-grown diamonds synthetic?

No. A *lab-grown diamond* is a **real diamond**, which differentiates it from other stones that are only intended to look like diamonds. But, in fact, the commercial use of the terms “*natural*” and “*synthetic*” has created some confusion.

Our diamonds **are produced according to Chemical Vapor Deposition** (CVD) technology: a diamond seed (lab-grown diamond powder) is placed in a vacuum chamber that is heated to high temperature and filled with a carbon-rich gas.

This gas is ionized, allowing the **pure carbon to slowly bond to the diamond powder**, atom by atom, layer by layer, ultimately culminating in the creation of the diamond.

## Are lab-grown diamonds real diamonds?

Yes, **lab-grown diamonds are as real as their mined** counterparts!

They share the same chemical, physical and optical properties, and therefore the **same purity and color qualities**.

The **only difference between** lab-grown diamonds and mined diamonds is their **origin**. The process of creating lab-grown diamonds reproduces the extreme temperatures and pressures that, tens of millions of years ago, gave rise to mined diamonds.

At Luxenter, **we are proud** to exclusively use lab-grown diamonds in our exceptional jewelry, where **they reveal their uniqueness** and sparkle for eternity.

## COLOR

The **international grading scale** starts at D to grade the *whitest diamond*, and follows the alphabetical order up to Z.

The diamonds in the Luxenter collections belong to the **D and E categories**.

## CUTOFF

Each diamond in our collection is hand cut and polished. Our diamonds **are cut with 57 facets**.

Luxenter looks for the cut whose *proportions, symmetry and polish* will give it the best brilliance, favoring in particular the pear, emerald and **brilliant cuts**.

## CLARITY

It is determined by the **quantity, size, nature and position** of the inclusions in the stone. The **international system measures** it in five categories.

The diamonds in Luxenter's collections belong to the highest categories: **VVS**.

## CARATS

The designs of our **Fine Jewelry collection** are based on a sober luxury to accompany you in your daily life.

Looking for that balance, we elaborate pieces with diamonds from **0.1 to 0.5 carats**.

A certificate with each of the jewels

## of our diamonds

Diamond certification is a process in which trusted experts use a standardized grading system **to quantify a diamond's key characteristics.**

Luxenter jewelry from the **Fine Jewelry** collection comes with an **SGL certificate** on the quality of custom diamonds.

The logo for Luxent Fine Jewellery is centered on a dark blue background. The brand name 'LUXENT' is written in a tall, thin, gold-colored serif font. Below it, the words 'FINE JEWELLERY' are written in a smaller, gold-colored serif font. The entire text is flanked by intricate, gold-colored line art illustrations of various flowers, leaves, and butterflies, creating a symmetrical, ornate border.
